# What It Means to Be a Blockchain-Based Decentralized Platform

## (i) Decentralized

The system is not controlled by any single central server or authority. Instead, it operates through multiple nodes (computers) that maintain and secure the system.

## (ii) Blockchain Technology

Blockchain is a digital ledger where every transaction or piece of information is automatically recorded and linked to the previous block in the chain. Once data is stored on the blockchain, it cannot be altered or deleted.

# What It Means to Be a Blockchain-Based Decentralized Platform

## (iii) Transparency and Security

All transactions and activities are recorded on the blockchain, making everything transparent. No one can alter or manipulate the data, which completely eliminates the chances of scams or fraud.

## (iv) Automated Operations

All transactions and income distributions are managed automatically through blockchain-based smart contracts. This eliminates the need for human intervention, making the system even more secure and reliable.

## DeFi and Web 3.0 Explained

DeFi (Decentralized Finance) operates using blockchain technology, which plays a crucial role in Web 3.0. Web 3.0 is designed to be decentralized and accessible to everyone, focusing on a bottom-up approach. The BOOSTER ECOSYSTEM leverages Web 3.0, commonly built on Ethereum, a popular choice for various DeFi applications. A blockchain functions as an immutable distributed ledger, ensuring transaction security through cryptographic measures.

# Earn Income By Playing Game

How many people will get gifts by playing the game

Points earned by booster community members by playing the game. A leader board ranking will be created based on those points. The number of gifts on the leader board depends on how many dollars have been deposited into the Global Fund of Gaming Gifts. From the amount of dollars in the fund, \$30 is given to each person until the end. The same will be given. For example, \$1000 has been deposited into the Global Gaming Fund. Then dividing it by thirty ( $1000/30=33.30$ ) is 33. So what's left in the fund after awarding \$30 to 33 people. Those dollars will be adjusted next session.

# Earn Income By Playing Game

## How to Claim Dollars

You can claim this gaming prize unconditionally for the first time after you have been nominated. But you get next 10 days to claim that dollar from the second time. You can claim it only if you have at least two personal referrals within the next 10 days. And if you don't do it within the next 10 days, those dollars will go back to the Global Fund again.

After claiming dollars from there you will get only 18 dollars in your account. The remaining \$12 will be split 12.5% to each of the 8 generations in your upline. Anyone within 8 generations of your downline on the same system can claim gaming rewards. Then you will also get 12.5% from that dollar.
